## **Job Description**

Lead .NET Developer

£60,000

# About Us

Based in Lancaster, Fuuse has rapidly established itself as one of the market leaders in the EV charging software industry. Powering electric vehicle charge points Fuuse is at the heart of one of the world's biggest emerging industries by powering the electrification journey with all the environmental and societal benefits it brings.

Working with a diverse mix of over 300 end clients including SSE, Scottish Power, Arnold Clark, BCA, Bentley, Toyota, Suez and Veolia, Fuuse is enabling the monitoring, maintenance, payments, energy optimisation, and controlling access to their charging infrastructure, which in turn powers over 100,000 vehicles who interact with our platform every month.

Together we process enough electricity to power the whole of the UK for an hour, and this is doubling every three months and payment processing exceeds £6 million a year.

Beginning as a team of four working on an Innovate UK grant during Covid we're now 65 highly-motivated and expert staff based across the UK and Ireland. In 2023 we grew by over 300% and aim to do the same again for the next few years.

This hyper-growth has attracted significant investor interest, and we recently closed a Series A round raising £8.7 million from YFM Equity Partners and our long-term backers Par Equity, which will power our path to profitability.

Our exciting journey comes with its challenges and its rewards. Every member of our team has share options and everyone can benefit from a rapidly changing workplace where opportunity, challenge and enjoyment are there at every turn.

# The Role

We are seeking a highly skilled .NET Lead to provide technical leadership and direction to our C# development team. The ideal candidate will have extensive experience in designing and implementing robust software solutions, coupled with strong DevOps practices. This role requires a proactive leader who can mentor and manage a team of engineers, fostering career development and ensuring high-quality deliverables. The ideal candidate will spend 1-2 days per month in our Lancaster office.

## **Key Responsibilities:**

Provide technical guidance and direction to the C# development team, ensuring adherence to best practices and design patterns.

Mentor and support team members, promoting professional growth and career development. Manage team performance and provide regular feedback.

Implement and manage DevOps practices to streamline development, deployment, and operations.

Build and maintain strong relationships with supporting functions such as Product Management, QA, and Infrastructure to ensure cohesive project delivery.

Lead from the front in a fast-paced startup environment, demonstrating agility and adaptability.

# Your Skills

## Required Skills and Experience:

- Technical Expertise:
- Proficient in C# and .NET framework.
- Strong experience with Azure, SQL Server, and Azure DevOps.
- Expertise in API design and development.
- Design Patterns: Deep understanding of software design patterns and principles.
- DevOps Practices: Experience with CI/CD pipelines, trunk-based development, automation, and infrastructure as code.
- Leadership Skills:
- Proven track record of mentoring and managing engineering teams.
- Strong line management skills, including performance management and career development.
- Collaboration: Ability to build relationships and work effectively with cross-functional teams.

## Desired Skills and Experience:

- Experience with Domain-Driven Design (DDD).
- Knowledge of automated testing frameworks and quality assurance practices.
- Familiarity with Terraform for infrastructure automation.
- Understanding of event-driven design principles.
- Previous experience working in a startup or scaleup, preferably within the EV or similar high-growth industry.

# What we offer

- A competitive salary depending on experience;
- 25 days holiday;
- Flexible hours;
- Remote working
- A workplace pension;
- Access to Health Assured Employee Services
- A scale up environment where you'll have a voice in the business as we grow our products and services.
