

Fuuse

Empowered to
Achieve More

Job Description

Project Manager

About Us

We are Fuuse: a state-of-the-art electric vehicle charge-point management system. With announcements from the government that the sale of internal combustion engine vehicles will be banned by 2030, the use of EVs and their charging infrastructure is set to explode in the coming years. Fuuse will help companies accelerate their EV ambitions and be at the forefront of this zero-carbon transport revolution. Read more at www.fuuse.io.

Our customers already include organisations from national charge point networks, local authorities and international energy companies.

The Role

We are looking for a Project Manager to join our Customer Success team, and make sure that our enterprise customers and their chargers are seamlessly onboarded on to Fuuse.

Projects involve co-ordination of physical activities such as charge point installations or migrations, and software based tasks such as facilitating the creation of white label mobile apps or working with a customer's IT team and our developers to setup single sign on connections.

These projects are often complex and constantly evolving, so the ability to make a plan and then navigate a changing situation is essential. Impeccable organisational skills are an absolute must. Good communication with customers, third-party suppliers and internal stakeholders is also critical.

Flexible working hours and remote working options come as standard with the position, and we encourage anyone to apply, regardless of their background and level of experience. While our office is based in the heart of Lancaster, we are open to candidates based anywhere in the UK who are happy to work from home.

Your Skills

- Experience managing projects that span digital and physical mediums, preferably within EV or in a comparable sector
- Willingness to learn about technical aspects of EV charging
- Exceptional organisation and communication skills
- Willingness to travel to site when required
- Experience using project management tools such as Jira Work Manager

What we offer

- A competitive salary depending on experience;
- 25 days holiday;
- Flexible hours;
- A workplace pension;
- A start-up environment where you'll have a voice in the business as we grow our products and services.
